Professional Experience

Full Stack Software Engineer Co-op   7/2018 – 12/2018
Welltok, Burlington, MA

- Rolled out and maintained custom GitHub integration for Rally to entire development organization of ~100 staff
- Delivered UI features each development cycle using React and Ruby on Rails, and increased test coverage by creating/modifying over 20 Jest tests
- Collaborated with other teams to synchronize feature planning during company-wide SAFe meetings

Full Stack Software Engineer Co-op   7/2017 – 12/2017
Solaria Labs, Boston, MA

- Managed in-training team of 3 engineers to create a product list API using Flask. Designed and built API to access ~6500 items scraped using Scrapy
- Launched MVP through production for a greenfield product in the gig economy space featuring integrations with over 20 major gig services, and completed stories in response to client feedback post-launch
- Created UI components using React + Redux to support development for numerous production teams

Teaching Assistant   9/2016 – 12/2019
Khoury College of Computer Science, Boston, MA

- Collaborated with Professors and other course staff to provide consistent grading for 400+ students
- Guided students through questions about homework and course content during office hours
- Prepared and led lectures on course material during weekly lab sessions of 25-50 students
